3years

Carrier warranty

Carrier invented modern air-conditioning in 1902. Since then we are continuously innovating our products to provide you excellent efficiency and energy savings.

Air quality light indicator

The device recognizes air quality and its light indicator changes color, depending on the level of air purity: Excellent (Blue), Good (Green), Moderate (Purple), Poor (Red).

Pre-Filter

The pre-filter withholds the largest dust particles suspending in the air, removing them from the air flow before they enter the air-conditioning unit. It covers the air intake and thus helps keeping the unit and the coil clean from dirt and debris, providing better air quality. The pre-filter can be removed and cleaned with soap-water without losing its effectiveness.

Filter replacement alert

A special indication on the device's control panel notifies you when it is time to replace the filter.

Operation timer

Set the device to operate for 1, 2, 4 or 8 hours, for the best planning of the air purification of your space.

Note

The manufacturer reserves the right to change the characteristics of the products, the elements and the images, without prior notice.
