Carrier Warranty

Carrier invented modern air-conditioning in 1902. Since then we are continuously innovating our products to provide you excellent efficiency and energy savings.

Follow Me Mode

A temperature sensor built in the remote controller will sense its surrounding temperature. The unit can adjust room temperature more accurately to the area you place the remote controller, to give you greater comfort.

[READ MORE](#)

Self Diagnosis & Auto Protection

Once abnormal operation or part failure happens, the unit will shut off automatically to protect the system. Meanwhile it will indicate protection or error code for fast service.

Note

The manufacturer reserves the right to change the characteristics of the products, the elements and the images, without prior notice.

Auto Swing

You can select the louvers to move automatically or choose the exact air flow direction using the remote control, as the unit is equipped with motorized air-louvers.

Sleep Mode

This mode saves energy and improves night time comfort. The set temperature will increase by 1°C per hour in cooling mode or decrease by 1°C per hour in heating mode, for the first 2 hours of operation. Thereafter the unit will retain the new temperature for 5 hours after which it will switch off automatically!

Energy Save Mode

Intelligent on-off technology enables the unit to automatically enter energy-saving mode when on standby mode.

Timer

Allows you to start the unit at a preset time in the desired cooling or heating mode.

Air Filter

The unit is equipped with washable air-filter that improves air quality.

Automatic Restart

After a potential power failure, the unit will automatically restart, keeping all previous settings.
