5years

Carrier Warranty

Carrier invented modern air-conditioning in 1902. Since then we are continuously innovating our products to provide you excellent efficiency and energy savings.

Self Diagnosis & Auto Protection

Once abnormal operation or part failure happens, the unit will shut off automatically to protect the system. Meanwhile it will indicate protection or error code for fast service.

Chiller leakage detection system

In case of cooling fluid leakage, the unit automatically detects the leak and shuts operation down while at the same it alerts you with the corresponding malfunction code on the indoor unit screen.

Note

The manufacturer reserves the right to change the characteristics of the products, the elements and the images, without prior notice.

Timer

Allows you to start the unit at a preset time in the desired cooling or heating mode.

Automatic Restart

After a potential power failure, the unit will automatically restart, keeping all previous settings.

Remote Control Locking

You can lock the remote control to make sure that the selected settings are not accidentally changed.

3D DC Inverter

The indoor unit is equipped with a DC inverter fan motor. The outdoor unit is also equipped with DC inverter technology compressor and fan motor. With 3 DC inverter motors the unit achieves maximum performance and energy efficiency.
